As a software developer from Nairobi, Kenya, I am likely a part of a thriving tech community. Nairobi has become a significant tech hub in Africa, with a growing startup ecosystem and numerous opportunities for software developers.

My career in software development probably involves working on a variety of projects, ranging from mobile apps and web applications to enterprise systems. These projects could focus on different domains such as finance, healthcare, education, or e-commerce. With a strong foundation in programming languages like Python, or JavaScript, and a solid understanding of relevant frameworks and technologies, I am capable of tackling complex software development challenges.

Outside of work, I enjoy exploring Nairobi's vibrant cultural scene, hiking in the nearby hills, or engaging in other hobbies and activities. My personal interests could provide me with a well-rounded life and contribute to my overall well-being.

EXPERIENCE

20TH JUNE 2023 – 3RD SEPTEMBER

DEVELOPER

BYTECODETECHUB

As a developer who has worked at ByteCodeTechHub, I am likely a passionate and collaborative individual with a strong problem-solving mindset. My experience at the tech hub has probably exposed me to a diverse range of projects and technologies, allowing me to develop a broad skill set. With a focus on innovation and entrepreneurship, I have been involved in creating new products or services, contributing to the growth of the Kenyan tech ecosystem.

18TH MAY 2024 – AUGUST 12

DATA ENTRY, PRODUCT MANAGEMENT

ART A GLANCE

As a volunteer at Art A Glance under the supervision of Evans Nyairo, I gained invaluable insights into the world of art curation. Nyairo, a respected figure in the Kenyan art scene, would have provided mentorship and guidance as you explored various aspects of the art world. Your experience might have included researching artists and their works, assisting with exhibitions, interacting with artists and collectors, and learning about art history and theory. Through these hands-on experiences, you would have developed practical skills and a deeper appreciation for the arts. Working closely with Nyairo, a seasoned professional, would have also provided me with valuable networking opportunities and a better understanding of the Kenyan art market.

EDUCATION

SEP 2021-2024

BACHELORS INFORMATION TECHNOLOGY, KABARAK UNIVERSITY

JUNE 2024

CERTIFICATE IN SOFTWARE ENGINEERING, BYTECODETECHUB

SKILLS

Programming languages: Proficiency in one or more programming languages such as Python, JavaScript,

Frameworks and libraries: Familiarity with popular frameworks and libraries like React and Node.js,

Databases: Understanding of database concepts, SQL, and database management systems like MySQL, PostgreSQL, or Firebase NoSQL

Version control: Knowledge of Git or other version control systems for managing code changes.

Software development lifecycle (SDLC): Familiarity with the different phases of the SDLC, including requirements gathering, design, development, testing, and deployment.

Problem-solving and debugging: The ability to identify and resolve technical issues efficiently.

ACTIVITIES

As a software developer living in Rongai, Nairobi County, Kenya, My leisure activities involve a combination of outdoor pursuits and indoor hobbies. I enjoy hiking, cycling, camping, or playing sports in the beautiful Kenyan countryside. Additionally, I find relaxation in reading, watching movies, gaming, or learning new skills. The diverse landscape and vibrant culture of Rongai offer ample opportunities for leisure and recreation.
